Question **10**

Not complete

Marked out of 1.00

Manoj, a developer at MoneyMatters Inc., is working on improving the company's financial system. He needs to create a program that takes an integer input, converts it into a double, and displays both the original integer and the converted double value.

Input Format :

The input consists of a single integer representing a monetary amount.

Output Format :

The first line of the output displays the "**Original Integer:** ", followed by an integer representation of the input value.

The second line displays the "**Converted Double:** ", followed by a double value representing the input as a decimal value.

Refer to the sample output for the formatting specifications.

Sample testcases :

Testcase 1 Input

20

Testcase 1 Output

Original Integer: 20

Converted Double: 20.0

Testcase 2 Input

53

Testcase 2 Output

Original Integer: 53

Converted Double: 53.0

For example:

Input	Result
20	Original Integer: 20 Converted Double: 20.0

Input	Result
53	Original Integer: 53 Converted Double: 53.0

Answer: (penalty regime: 0 %)
